Ds. Sumber, Kec. Sanankulon Kab. Blitar

6th semester student of Business Information Systems with expertise in website design and development. Have experience in working on college project projects such as creating android applications, designing and building websites.

Education

MAN 1 Kota Blitar - Kota Blitar, Jawa Timur

Jul 2017 - Jun 2020

MIA (Natural Science Mathematics)

Politeknik Negeri Malang - Kota Malang, Jawa Timur

Jan 2020 -

D-IV SIB (Business Information System)

Lecture Project

Design and Web Programming

Feb 2020 - May 2021

Front End

I was assigned to make a group website creation project. Here my team created an e-commerce website to sell clothes. This is our first html project assignment. We implemented bootstrap to make the design look better.

My activities on this project:

- Designing a web on Figma. I took several references from internet sources for me to make ideas
- I implemented a design that was created in figma to be executed on the web using HTML

Advanced Web Programming

Sep 2021 - Dec 2022

Front End and Back End

I got an assignment to make an advanced web programming project. Here I am in a group of 2 people including me to create an e-commerce website. The results of the project are listed in the link:

https://github.com/IbnuRizalKhusaini/Project_Akhir.git

My activities on this project:

- Submit a proposals regarding the project to be carried out
- Based on this proposal, I made a web design on figma before implementing the website creation
- I execute to build the web using the Laravel framework. Here I included a template for the design and also implemented Laracast.

Mobile Programming

Apr 2021 - Jun 2022

Front End and Back End

Here I am with a group creating an e-commerce project using the flutter framework. The result of this project is an android application for buying and selling product catalogs. Further details can be seen on the github link: <https://github.com/room2468/final-project-group-5.git>

My activities on this project:

- Make a proposals for the project
- Designing project UI on figma and build in to prototype for presentation
- consultation with lecturers about how to realize the prototype to be used as an android application
- I realize the website using the Flutter framework

Project 1

Mar 2021 - Jun 2022

Front End and Back End

This project we developed further from advanced web programming projects. In this project, I fix some of the problems that existed before, and improve to make the web better. The results of can be seen on the link: <https://github.com/BagosHadiWijaya/Proyek-01.git>

My activities on this project:

- Submit project proposals
- Designing on figma and build prototype for presentation project
- Make weekly reports for reporting progress to lecturers which will be presented later
- Build the web using the Laravel framework. I use Laracast and implemented template design.

Information System Project

Mar 2023 - May 2023

Front End and Back End

On this project, my team and I worked with CV partners. DWI PUTRA INGGIL PROSPEROUS. Our team created a catalog website for selling their products. The results of the work are in the following link: <https://github.com/IbnuRizalKhusaini/Proyek-SI.git>

My activities on this project:

- Create proposals for submitted to partners and lecturers
- Designing UI on figma and build the prototype

- Make weekly report to share difficulties and work progress
- Build e-catalogue website using Laravel framework

Organization Experience

UKM USMA (Usaha Mahasiswa)

Apr 2021 - Present

Field Coordinator, PDD Coordinator

UKM USMA is a student activity unit engaged in entrepreneurship under the auspices of the State Polytechnic of Malang which is based on family and mutual cooperation. I once served as a field coordinator and PDD coordinator in one of the USMA UKM work programs. My activities include:

- Coordinate members to complete their respective tasks
- assist members who have difficulty completing their tasks
- Supervise the running of the event so that it runs smoothly

Skills

- **Hard Skills:** HTML, PHP, Laravel, Flutter, Figma
- **Achievements** 🏆 (2021): VSGA Junior Graphics Design
